VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE TITLE:

The title of the invention has been replaced with a new title.

IN THE CLAIMS:

Claims 14 and 23 have been amended as follows:

14. (Amended) An electronic camera, comprising:

an image pickup unit for capturing an image of an object;

a recorder for recording the image captured by the image pickup unit on a recording medium;

a playback unit for at least playing back image information that is recorded on the recording medium;

a mode selector for selecting a function diagnosis mode; and

a function tester for testing functions of the camera if the function diagnosis mode is selected by the mode selector, the functions of the camera to be tested including functions of at least one of the image pickup unit, the recorder, and the playback unit.

23. (Amended) An electronic camera, comprising:

capturing means for capturing an image of an object;

recording means for recording the image captured by the capturing means on a recording medium;

playback means for playing back image information that is recorded on the recording medium;

selecting means for selecting a function diagnosis mode; and

testing means for testing functions of the camera if the function diagnosis mode is selected by the selecting means, the functions of the camera to be tested including functions of at least one of the capturing means, the recording means, and the playback means.
